Jeff,

Thanks for checking in with us. Let's go ahead and move forward with this. Jeff Rodin and I discussed this matter last year and agreed to proceed in the manner you described. It works for us. Have a safe and happy 4th. Thanks again!

Best Regards,

bruce

Subject: shades of seattle

guys, I have correspondence from this project dating back to when Merritt was in 3rd grade.

My recollection of the last instruction regarding the materials at our warehouse was that E&E should collect 2 four ounce sample jars of each Shades of Seattle container in our custody. We will photograph and document the sampling of each container like it is a site, including chain of custody for the 'new' samples. Afterwards, we will compose a memo to Jeff and Bruce describing the collection of the samples, transfer of custody to Bruce or Jeff(?), and eventual disposal of the remaining drums and contents.

Steve has already contacted a disposal company for price and appointment. Bruce/Jeff, are you guys OK with this? Do we have the official approval to proceed?

Jeff, what do you want us to charge to do this? FYI, I estimate about \$5K for labor and disposal cost. Let us know ASAP.
